DIRECTIONS

WEAR GLOVES WHILE HANDLING

PLANTS & SOIL - Use as a topical application or tilled into the soil at pre-plant (2-4 oz per square yard), another oz per square yard during budding and another 2 oz approx. 3 weeks before harvest. For soils deficient in Nitrogen, Phosphorous and Calcium, double the rates.

TRANSPLANTS OR NEW PLANTS - Sprinkle in transplant hole and around plant.

BENEFITS

- Supplies a rich quantity of plant nutrients.
- As a fertilizer it stimulates growth of soil microbes that breakdown organic matter to release and supply plant nutrients.
- Raises fertility of all soil types
- Increases soil nutrients following harvest.
- Promotes development of plants that need to make a lot of growth in a short amount of time.
